Training is very important to the development of professional firefighters. Whether in the classroom or the training tower, it is here that safety attitudes and practices are developed. We must all take the time to get needed training!

DISCUSSION

- Do we emphasize safety enough while training?
- Do we have repeat types of accidents when training?
- How does the district address safety violations?
- How can our training be improved?

The greatest asset of the fire service is our people; protect them!
